- Audited financial supplier contracts for large retailer, identifying variances in procurement and payment processes that generated over \$2M in savings.
- Reviewed contracts, agreements, paperwork and electronic documents looking for possible missed opportunities in vendor funding using VBA in Excel.
- Spearheaded sales analytic projects focused on maximizing point-of-sale revenue, points of distribution and product visibility.
- Received, cleaned and prepped data from client using Python, SQL and VBA in Excel to help data scientists build marketing mix models

WORKPLACE SAFETY AND INSURANCE BOARD (Canada's Biggest Compensation Board)

Data Analyst

Toronto, Canada

June 2019 – Apr 2023

- Developed new data warehouse using SQL server that helped Ontario North West team to improve claim processing time from 12 days to 7 days.
- Monitored nation-wide/territory sales reporting with established quarterly targets of over 50 million dollars set against KPIs.
- Created a comprehensive sales performance dashboard in Tableau, enabling the sales team to track and compare sales metrics across different regions and time periods.
- Collaborated with Business Intelligence to facilitate reporting needs of Sales Teams and automation within the Tableau environment.
- Designed and developed dynamic dashboards and visualizations using Tableau to support business strategy and operations.
- Automated data ingestion and transformation workflows using Google Cloud Platform (GCP) tools like Cloud Dataflow, Cloud Pub/Sub, and Cloud Storage.
- Provided commentary with insights on key trends pointing out outliers e.g., performance of categories/SKUs
- Successfully migrated legacy data warehouse systems to Google BigQuery, resulting in 14% cost savings and improved scalability.

- Worked with data engineers and senior management to develop customized sales reporting tools. For example, utilized Python to merge reports and generate a final report showing all required sales information and important ratios.

FEDEX TRADE NETWORKS (Fortune 500 Transportation Company)
Data Associate

Mississauga, Canada
Nov 2018-June 2019

- Responsible for transcribing all relevant information from cargo control documents into the AS400 mainframe to produce required import files.
- Screened cargo control documents for shippers with an assigned customs broker.
- Outbound calls to clients to acquire brokerage information and billing requests in a courteous and professional for further information when required.
- Resolved discrepancies on documentation for time sensitive shipments to avoid clearance delays.

NATIONAL SOCIAL SECURITY FUND (East Africa's Biggest Pension Fund)
Performance Analyst

Kampala, Uganda
Sept 2012 - Oct 2018

- Provided senior management with data envelopment analysis that measures efficiency of staff and branches which led to 7% increased efficiency from restructuring and company reorganization.
- Partnered with developers to automate manual processes using Tableau and SQL Server, saving time and money while decreasing errors. Credited as a primary driving force behind a 5% increase in margins in the fiscal year.
- Worked with fixed income analysts to tailor investment strategies and present market insights, enhancing client satisfaction and fostering long-term partnerships.
- Developed a customer segmentation analysis dashboard using Tableau, allowing marketing teams to identify and target key customer segments effectively.
- Developed and maintained financial models to assess company valuations and investment risks, aiding senior management in data-driven decision-making.
- Conducted internal and external company research that identifies trends and correlation that enables the organization to better adopt and improve operations and services. This research led to improvement in turnaround time for benefits payment from 62 days to 7 days.
- Ran python data cleaning models to help improve the operations data quality index from 45% to 89% in two years.

EDUCATION/ CERTIFICATIONS
